

Steel Precision Group specialises in preparing shop drawings using sophisticated structural steel software for commercial, residential and industrial uses. We are on-time with delivery and guarantee 100% accuracy. When you require the best, speak to us. We offer a variety of services including:

- Highly accurate steel shop drawings
- Structural Steel Drafting
- Design Assistance
- Drafting Services
- Structural Steel Detailing

Our work has great diversity and complexity. We are committed to resolving design problems, simplifying connection details and attending site meetings if necessary. We use Prosteel, a German Designed 3D Software especially designed for steel shop drawings. We ensure all updates and maintenance are timely.

Steel Precision Group is owned by Michael Nikolic and Admir Berberovic, two engineers with over 15 years of experience in the industry.
